from a copy received to Arboretum Mustila 1999

A TENTATIVE LIST OF PLANTS GROWING IN THE ARBORETUM MUSTILA

compiled by Pentti Alanko 8.4.1972

The list included plants identified by me during the summer 1971 and all mentioned in the following publications:
Tigerstedt - Forslund, 1958: Lövträd på Mustila (Graduate thesis)
Tigerstedt, 1960: Arboretum Mustila (an excursion guide)
The nursery catalogue of Mustilan taimitarhat 1971

The underlined numbers have been collected by Pentti Alanko during 1971. Herbarium specimens are deposited in the following herbaria: Institute of Horticulture, University of Helsinki and in the herbarium of Arnold Arboretum, Boston. Some uncertain determinations and plants which have not been refound and are probably extinct, have been marked with question marks.

The abbreviations I-XII refers to places in the Arboretum according to Tigerstedt - Forslund 1958 and 1-60 in Tigerstedt 1960. (See the map). Plants growing in the nursery (mentioned in the nursery catalogue), are marked with 't'. With '+' have been marked those origin mentioned in Tigerstedt 1960.

All corrections and additions are welcome.
