

COMMERCIAL SEED LIST

March 31st 2026

Seeds sold either has **5 € "hobby bags"** (containing 4 to 20 viable seeds), or in **amounts of grams** (prices per 10 g unless otherwise stated, minimum order per seedlot either 10 euros or 1 hobby bag). Very small or very large seeds, where this pricing system has proved to be impractical, are priced per 100 seeds or other reasonable amount.

Seeds collected at Arboretum Mustila are VAT free. For seed collected elsewhere the prices include VAT of 25,5%.

Cold hardiness approximations follow the Finnish zone system: I for the mildest climate of Southwest coast and islands, VIII for northern parts of Lapland. There is no one-to-one correspondence to the better-known USDA zone system, because the Finnish system also takes into account summer heat as a limiting factor.

- * marks a short-lived fresh-stored seed available only for a limited time (usually winter)
 - × marks seed-lot possibly or probably including hybrids due to open pollination
 - ♣ marks a species with known invasive tendency in certain situations of Finland
 - ❖ needs extremely sharp drainage in Europe (roots intolerant of autumn/winter soak/freeze)
- SS = seed stand
